

Propagating Indigenous Plants  
for the Parks and Bushlands  
of Ringwood

Dear Volunteer,

Over the last year as you know we have slowly pieced together a Community Nursery. We had our official opening at the Plant Give away, our Mayoress Margret Cheevers officially opened the Nursery. If you have been to the Nursery lately you will have noticed there are a sought variety of species from Wallaby Grass through to Acacias, Spiny Headed Mat Rush, Golden Bush Peas, Grass Trigger Plants, Hop Goodenia and others.

Plants that are produced are for future plantings and CCRISPP has supplied plants to SGAP Marroondah for F C Rogers Res. in Heathmont.

Heathmont has the pleasure of gaining a new group called Heathmont Bushlink. They will be working on the Heathmont Railway Line area, Dandenong Creek and other remnant Bushland For further information contact Roger Lord on 870 5262. CCRISPP will play apart in meeting there needs for Revegetation projects.

Our Friday mornings have consisted of pricking out, mulching of the Nursery and planting garden display beds. We now have a Nursery Operations folder which will assist volunteers in preforming tasks of the Nursery. Saturday at the Nursery 16/7/94 at 9.30 we will be finishing of pricking out and minor maintenance. I invite all volunteers along, be involved in a light work morning, lunch and followed with a walk through one of the Citys' precious remnant Bushlands

**MONTHLY INDIG. PLANT**

Gompholobium huegllii COMMON WEDGE-PEA

This spreading little shrub is significantly rare in the City of Ringwood. It can be found in the Reserve next to the Heathmont Station and Loughies Bushland Nth Ringwood. Grows to about 60cm high and has large,, bright yellow pea flowers in sept. to Feb. Leaves are in threes (or leaflets) are narrow and pointed. Very attractive in flower with many fine branches. The seed has to be scarified (using boiling water) for propagation. Keep an eye out for this little beauty.

Hope to see you soon at Council Parks Depot, Greenwood Ave.  
For any further information contact Brad Curtis on 871 0286
